FOUNDER'S INTRO

During his professional practice as an engineer in Nigeria, the founder and a colleague became aware of the scarcity of national engineering firms that measure up to high international standards, and can undertake the much needed technical studies in the fields of Renewable Energy (Solar), Telecommunication, and other engineering areas.

Conversely, Nigeria is a knowledge source of highly qualified manpower such as engineers and technicians graduated from the Nigerian schools and Foreign Universities. Thus, **WETOM TECH.** was founded to provide these highly qualified specialists with the adequate opportunity to apply their know-how in the development and service of their clients.

Based on the principles we have adopted, we are full of confidence that our organization will continue to develop and grow enabling us to achieve our professional aspirations.

ABOUT US

We are a technology company that specializes in the installation and maintenance of solutions in the area of Renewable energy (solar), Telecommunication infrastructure and development. Our bespoke services cut across industries like Telecom, Real Estate, Transportation, Utility and Energy, Banking, Education, Government, Machine Manufacturing, and Agriculture. We provide our clients with an integrated approach to reliable project delivery in the evolving globalized world. Proactive rather than reactive, we enhance people's lifestyles and the economy.

Our service delivery is unique because it is continuous. Through teamwork and effective communication among members of staff, we deliver results against all odds, regardless of external challenges. We pay close attention to market trends so that we can stay up-to-date in our service delivery. Why? Because we are dedicated to making sure our clients are satisfied no matter how extensive or minimal the project. **WETOM TECHNOLOGY** currently operates in West Africa (Nigeria).

Mission

To help Customers build a reliable, secure, manageable solution that establishes a foundation for Clients to meet their objectives.

Vision

To continuously improve its world-wide rating among the top engineering firms, pioneer state of the art technological solutions and provide the best professional service value regardless of project size or profitability.

Our Commitment

As a solution provider, we are committed to adding value to our clients and this is an integral part of our strategy. We act in a sustainable and responsible manner every day. This is what being committed to better lifestyle is all about for us.

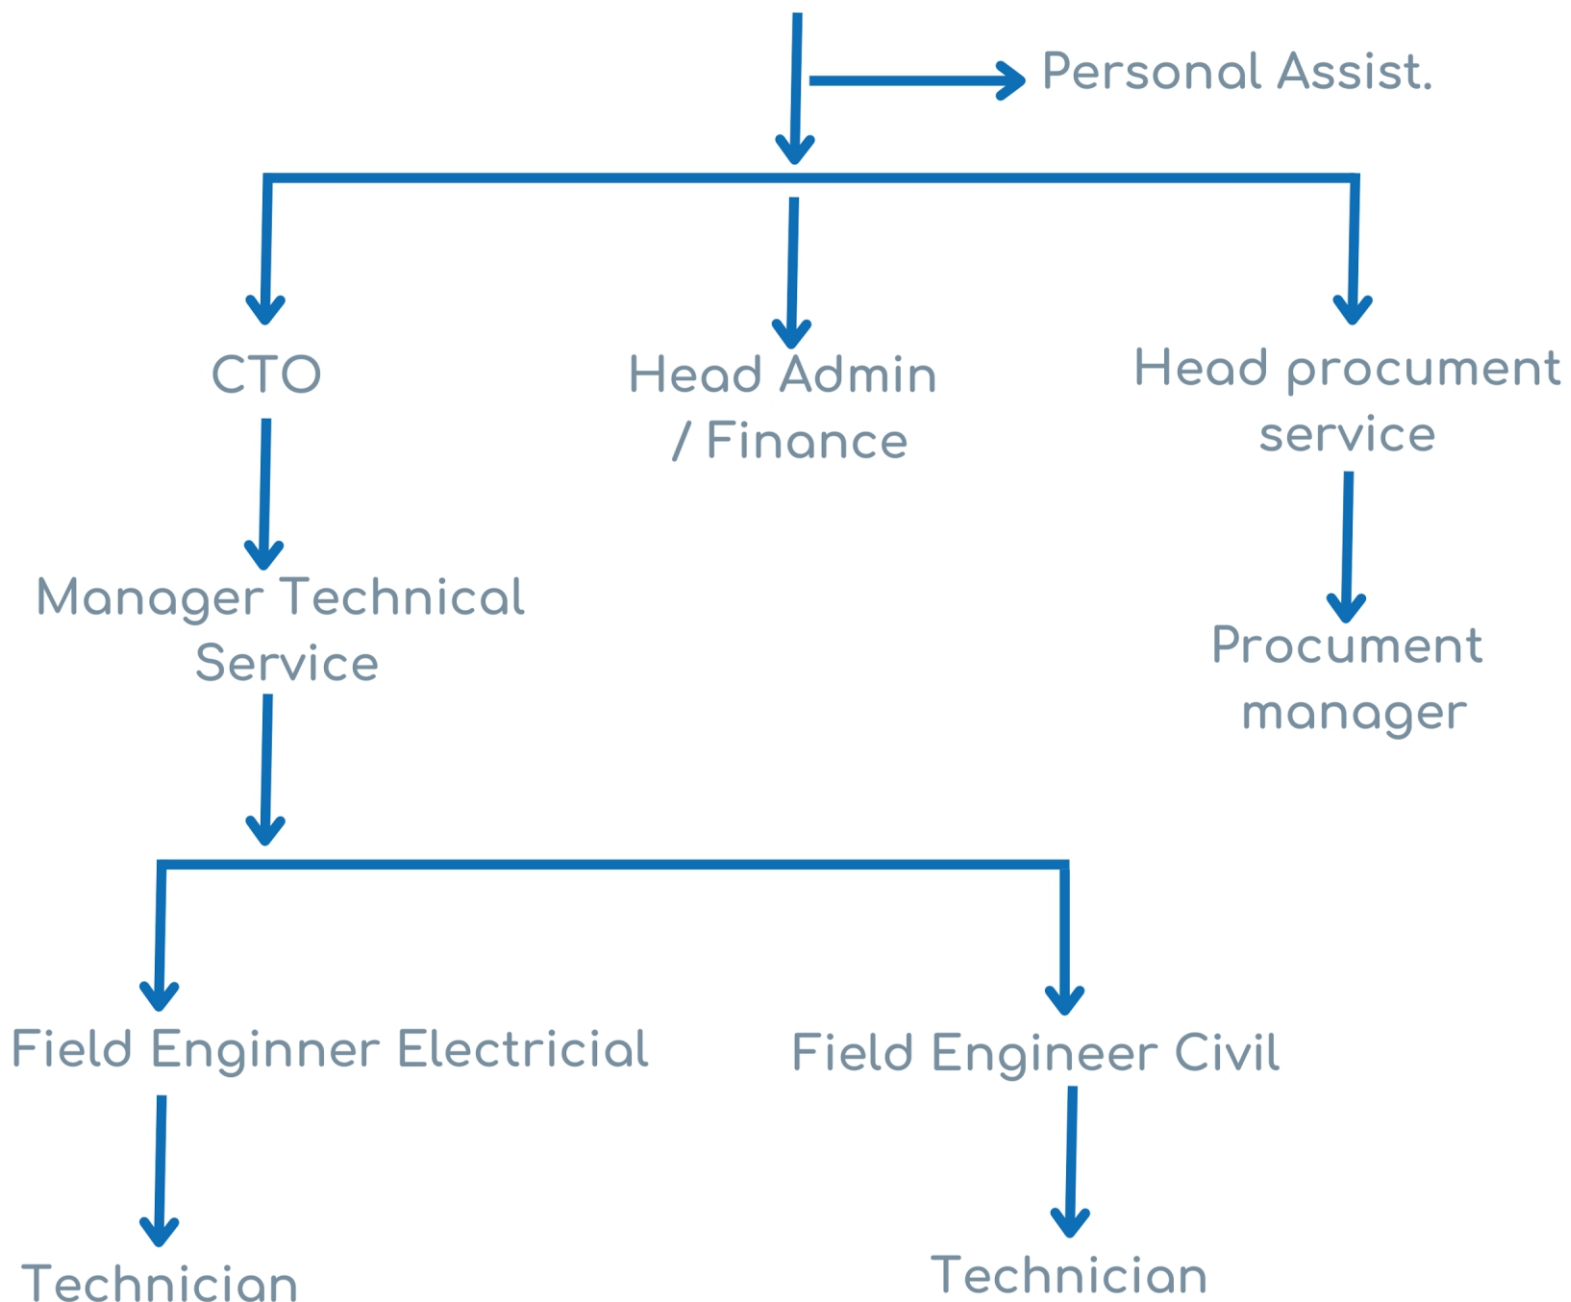

Our Values

We have a set of values that guide our engagement with our respectable clients. They include: Teamwork, Integrity, Continuous Learning, Leadership, Passion, Work/Life Balance, and Empathy.

Field Labor

QUALITY STATEMENT

As the management team of WETOM TECHNOLOGY we commit ourselves to comply with the requirements of all professional regulation bodies like COREN, CORBON, etc. as defined within our Quality Management System. We will position ourselves to be a leader within our industry and maintain that professional reputation with pride. To live up to our mission statement and to achieve our objectives, we will strive to build the organization with a hands-on approach. We will provide the framework for our team of qualified, committed and enthusiastic people within which they can develop themselves to become the cornerstone of the business. We will further manage our business to ensure optimum business growth, with a distinct focus on client satisfaction resulting in client retention which would translate into financial success for all stakeholders. The management team and personnel will strive to find ways to continually improve the Quality Management System. To ensure that it continues to add value to the business, not only through market credibility, but also through internal pride.

TRAINING

WETOM TECHNOLOGY believes that constant training is one of the key to have efficient and effective manpower and in response to skill shortages in Nigeria, as a result, we will continually invest in training of field labour to increase its skill pool

We implement training programs in line with international best practice to advance its employee skills. To determine the appropriate skill development required, also provides an ongoing on the job assessment. In addition, long term incentives ensure retention of core and dedicated staff.

CORPORATE SOCIAL RESPONSIBILITY

At WETOM TECHNOLOGY, corporate social responsibility is integral and of high priority to our overall business strategy.

Corporate Social Responsibility projects are itemized and selected based on social need and the extent to which they are aligned to our business and can add value to our clients and to the host community in which we operate.

Our policy is to identify worthy social economic development projects in the areas we work. Past experiences of such developmental project we had undertaken over the years proved to be successful and had made meaningful difference to both our clients and the host communities.

ENVIRONMENT, HEALTH AND SAFETY

The importance of safety to the environment, workplaces, workers, tools etc, can not be overemphasized, these we have not ignored.

The value to human life is not measurable hence, unsafe environment and unsafe acts are not encouraged. We as a responsible corporate entity invest so much on training to protect both the staff and environment for the mutual benefits of our clients and our staff.

It is historical that most of the accidents are caused by things people do or failed to do. To mention a few, ranging from carefree, lackadaisical, and careless attitude, using of bad tools and implement, working without the necessary protective equipment, taking short cut by bypassing laid down procedures in job implementation, incompetence, lack of technical skills required.

There is a common saying "SAFETY IS NO ACCIDENT ".The constant jingling of safety rules on our staff has made safe acts a way of life. WETOM TECHNOLOGY does not tolerate any unsafe act either to oneself, to others or to the environment we operate either before, during or after operations.

OUR SERVICES

With adequate experience in handling major projects, **WETOM TECH** provides client-oriented professional services, following international standards, codes, procedures, and more, with a commitment to excellence. Our expertise leaves us unparalleled in skills, quality, and leadership. Our services are as follows:

Telecom Infrastructures

WETOM TECHNOLOGY meets the rising expectations for faster and more responsive service delivery, the widespread implementation of site build, energy solutions for telecommunication sites, and solar installation for homes and offices, with its cutting edge features. Telecommunication is now central to most public and private projects. Our main advantage stems from our technology leadership in major locations like Telecommunication sites, schools, homes, offices, and government organizations.

In addition to basic services such as strategic planning and integration, our engineers focus on performance optimization, thereby offering comprehensive solutions.

What we do includes:

- Upgrade and hybrid power backup system for telco sites, wear houses, and data centers
- Site build
- Equipment installation, maintenance, and monitoring

OUR SERVICES

Renewable Energy (Solar)

WETOM TECHNOLOGY, our qualified and well-trained engineers recognize the individuality of each client's requirements. As a result, we tailor practical solutions to the client's needs and budget. Our commitment to sustainability has been an integral part of our design philosophy and has been conveyed as a cultural transfer to our clients. We are taking these core values to the next level of implementation through the use of renewable energy sources and energy-efficient systems. Our professionals provide a high standard of service in the following areas:

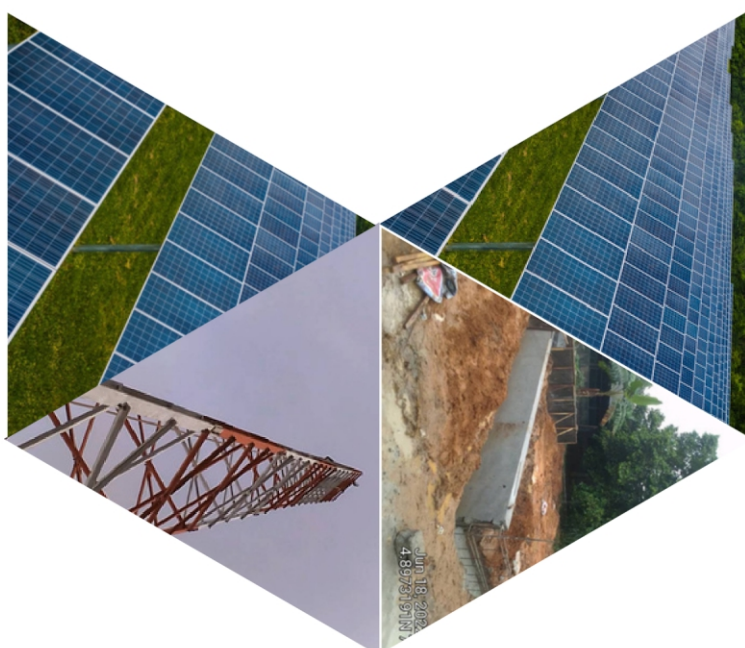

- Hybrid power backup system for telcos
- Solar Home System
- Farm Electrification
- Backup power for homes and offices
- Smart Solar street light

Our power & renewable energy (solar) installations also touch on the following:

- Off grid solar power for ATMs, offices, telco sites and Residential areas
- Roof top, Car park, and ground mount solar system and maintenance
- Energy audit and management

Industries we serve include:

- Telecommunication
- Real Estate
- Utility and Energy
- Banking and Finance
- Education and Government
- Manufacturing and
- Agriculture.

OUR SERVICES

Internet Service and Deployment

WETOM TECHNOLOGY RESOURCES LTD is a leading provider of high-speed fiber internet services, dedicated to delivering fast, reliable, and secure connectivity solutions to various sectors. Our mission is to bridge the digital divide and empower individuals, businesses, and communities to thrive in today's connected world.

OUR PROJECTS

These are some of the projects we have completed and currently maintaining as needed:

LIB/rectifier cabinet installation
